

Q.1) Write a Python program to print all even numbers from a given list of numbers in the same order. Stop printing if any number that comes after 237 in the sequence is encountered.

Sample

numbers list :

```
numbers = [ 386, 462, 47, 418, 907, 344, 236, 375, 823, 566, 597, 978, 328, 615, 953, 345, 399, 162, 758, 219, 237, 412, 566, 731, 210, 912, 216, 244, 896, 101, 867, 355, 430 ]
```

expected output:

386 462 418 344 236 566 978 328 162 758

```
numbers = [386, 462, 47, 418, 907, 344, 236, 375, 823, 566, 597, 978, 328, 615, 953, 345, 399, 162, 758, 219, 237, 412, 566, 731, 210, 912, 216, 244, 896, 101, 867, 355, 430]
```

```
for num in numbers:
    if(num == 237):
        break
    elif(num % 2 == 0):
        print(num, end= " ")
    else:
        pass
```

Output:

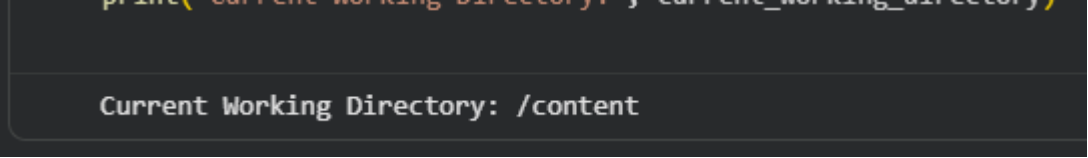

```
386 462 418 344 236 566 978 328 162 758
```

Q.2) Write a python program to get the path and name of the file that is currently executing

```
import os
```

```
# Method 1: Using __file__  
print("File Name: ", os.path.basename(__file__))  
print("File path:", __file__)  
print()
```

Output:

```
print(__file__)  
Current Working Directory: /content
```

Q.3) pattern

```
#      1  
#     212  
#    32123  
#   4321234  
#  543212345
```

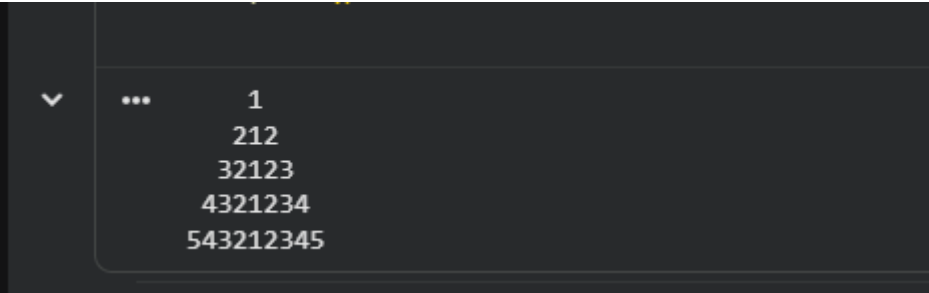

```
n = 5
```

```
for i in range(1, n + 1):  
    print(" " * (n - i), end="")  
    for j in range(i, 0, -1):  
        print(j, end="")
```

```
    for j in range(2, i + 1):  
        print(j, end="")
```

```
    print()
```

Output:

```
...      1  
        212  
       32123  
      4321234  
     543212345
```

Q.4) Write a code to accept a number & print its digits in words .

Ex: 321

Three

Two

One

```
num_dict = {0: "Zero", 1: "One", 2: "Two", 3: "Three", 4: "Four", 5: "Five", 6: "Six", 7: "Seven", 8: "Eight", 9: "Nine"}
```

```
lst = []
```

```
num = int(input("Enter a Number: "))
```

```
while num!=0:
```

```
    digit = num%10
```

```
    lst.append(num_dict[digit])
```

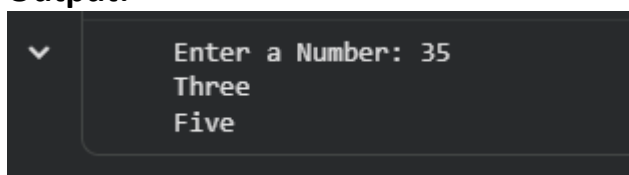

```
    num = num //10
```

```
lst.reverse()
```

```
for word in lst:
```

```
    print(word)
```

Output:

```
Enter a Number: 35
Three
Five
```
