Mo Tu We Th Fr Sa Su
 1  2  3  4  5  6  7
 8  9 10 11 12 13 14
15 16 17 18 19 20 21
22 23 24 25 26 27 28
29 30 31
```

#Q.3) Write a Python program to calculate number of days between two dates.

[use datetime module]

Sample dates : (2014, 7, 2), (2014, 7, 11)

Expected output : 9 days

```
from datetime import date

# Sample dates
date1 = date(2014, 7, 2)
date2 = date(2014, 7, 11)

delta = date2 - date1
print(f"{delta.days} days")
```

```
# Program to test whether a passed letter is a vowel or not

def is_vowel(letter):
    # Convert to lowercase to handle both cases
    vowels = 'aeiou'
    if letter.lower() in vowels:
        return True
    else:
        return False

# Example usage
letter = input("Enter a letter: ")

if len(letter) == 1 and letter.isalpha():
    if is_vowel(letter):
        print("its a vowel.")
    else:
        print("its not a vowel.")
else:
    print("Please enter a single alphabetic character.")
```
